

Get insulation rebates up to \$7,200

Air sealing is a smart investment that pays for itself over time. With these new rebates, there's never been a better time to upgrade your home.

To qualify for the air sealing rebate, you must also work with a contractor to install attic, basement or exterior wall insulation. Get rebates that cover up to \$7,200 of the cost of purchasing and installing upgrades.

ATTIC

Attic insulation can have a big impact on savings and comfort.

\$1/ft²
UP TO
\$1,500

BASEMENT

Properly installed insulation in the basement can help reduce condensation and keep water away from the foundation.

\$2/ft²
UP TO
\$1,900

EXTERIOR WALLS

Walls can account for up to 20% of home heat loss.

\$2/ft²
UP TO
\$3,800

To be eligible for a GreenON Rebate, ask for an R-value of at least 20 for basement and wall insulation. Attic insulation must have an R-value of at least 50 (you must install a minimum of R-20 to qualify).

Don't stop with air sealing & insulation!

Get rebates on more energy-efficient upgrades:

High-Performance Windows Rebate
Up to \$5,000

Smart Thermostat Rebate
Get \$100 back

Heat Pump Rebates
Air-source up to \$5,800
Ground-source up to \$20,000

The Green Ontario Fund is a not-for-profit provincial agency that invests proceeds from Ontario's carbon market into climate actions that help people and businesses reduce greenhouse gas emissions and use cleaner technology to power their homes and workplaces. The GreenON Rebates Program is delivered by the Independent Electricity System Operator. Equipment must be purchased from and installed by a participating contractor. Rebates under this program cannot be combined with other rebates or offers and are subject to additional terms and conditions.

For more information, visit greenon.ca/terms-and-conditions.

GreenON Rebates

Fight climate change with air sealing

GET
\$100
FOR AIR SEALING
WHEN YOU
INSULATE

Funded by
ONTARIO'S
CARBON
MARKET

Put a seal of approval on your home

Did you know that a typical home loses up to a quarter of its heat through tiny gaps and cracks? That means your heating system may be working harder than it needs to. Air sealing is one of the easiest and most economical ways to make your home more energy efficient.

To receive a rebate, combine air sealing with added insulation – it's a highly effective way to reduce energy costs, improve year-round comfort and help fight climate change.

GET INSULATION
REBATES UP TO
\$7,200
plus \$100 for air sealing

Easy DIY leak detection

Try this simple test

On a cold or windy day, light an incense stick and hold it near your door frame. If the smoke flutters, there's a leak.

More top spots to check:

- | | |
|--|---|
| <input checked="" type="checkbox"/> Attic | <input checked="" type="checkbox"/> Ducts |
| <input checked="" type="checkbox"/> Windows | <input checked="" type="checkbox"/> Garage |
| <input checked="" type="checkbox"/> Electrical outlets | <input checked="" type="checkbox"/> Exhaust vents |

Lock out leaks and insulate

In order to qualify for rebates, combine air sealing with insulation upgrades. Ask a participating GreenON contractor to assess your home and recommend the best options for you.

Why act now?

Even small actions can add up in the fight against climate change. The more we do now, the more we can prevent:

**extreme
weather
conditions**

**rising
insurance
costs**

**rising
food
costs**

How to qualify

To qualify for rebates, you must own a detached home, townhouse or semi in Ontario. If you rent, you must have the written permission of the landlord. Follow these steps:

- 1 Work with a participating contractor to purchase and install eligible insulation and air seal your home
- 2 Your contractor submits the rebate application on your behalf
- 3 You validate that work is complete, submit your proof of purchase and receive your rebate cheque in the mail in approximately 8-12 weeks
